### **Coaching Philosophy:**

Developing athletes technically from a young age enables them to better adjust to the fundamental requirements during the competitive years of their soccer careers. Beastmode Soccer, TSS' 1000 Touches, as well as one-on-one skills' exercises have been key to the development of the athletes under my tutelage, several of whom have gone on to playing in the BCSPL. Children participate in sports to learn, grow, make friends, and have fun, therefore – as well as promoting competition, and determination within – I also promote team bonding and a relaxed environment so each athlete feels that they're important to the team, and so they're driven to fulfill their maximum potential.
